You can set up and use Microsoft Outlook Express with your Webmail account, but before you set up your account in Outlook Express, you need to set your SMTP Relay options in your email account.

To Set Your SMTP Relay Options

1. Log in to your [Account Manager](#).
2. In the **My Products** section, click **Email/Email Forwarding**.
3. On the **Manage Email** page, in the **Email Account** list, click **Manage Account** next to the account you want to use.
4. From the **Relays per Day** dropdown list, select the number of relays per day you want to use for the account.
5. Click **OK**.

To Set Up Outlook Express with Your Email Account

NOTE: The following procedure is for Microsoft Outlook Express 6. You can also view the tutorial for [Setting up Your Email in Microsoft Outlook](#).

1. In **Microsoft Outlook Express**, select **Tools > Accounts**.
2. On the **Internet Accounts** window, click the **Mail** tab, and then click **Add**.
3. On the **Internet Connect Wizard**, in the **Display name** field, type your full name and click **Next**.
4. In the **E-mail address** field, type your email address and click **Next**.
5. On the **E-mail Server Names** window, from the **My incoming mail server is a list**, select **POP3**.
6. In the **Incoming mail (POP3, IMAP or HTTP) server** field, enter **pop.secureserver.net**.
7. In the **Outgoing mail (SMTP) server** field, type **smtpout.secureserver.net**, and then click **Next**.
8. In the **Account name** and **Password** fields, type your email address and password, and then click **Next**.
9. Click **Finish**.
10. On the **Internet Accounts** wizard, select the mail account you just created and click **Properties**.
11. In the **Properties** window, click the **Servers** tab.
12. Select **My server requires authentication**.
13. Click the **Advanced** tab.

14. In the **Outgoing mail (SMTP)** field, change the port number to **80**, and then click **OK**.

NOTE: If port 80 does not work, try port 25.
