Affordable WebSite Design & Hosting Service

You will receive two different creative concepts in about five business days. From there, you choose what you like and the final concept will be refined until you are 100% satisfied.

Your Content ...

After you approve the creative website plan, your custom design will be converted into common website form: HTML, CSS, javascript, and images. Then, the final website pages are created and populated with your content. You will need to provide text files for the content that is to be “cut” and “pasted” into each page of your new website. Creative writing services are available for an additional small fee.

Images & LOGOS ...

You may provide as many images as you want to be included on your website pages. In addition, a limited number of stock photos can be included (see table below). LOGO design is not included with the website design service, but can be quoted, along with other additional graphic design services.

	Economy	Deluxe	Premium
Maximum number of pages	5	10	20
Initial Design Concepts	2	2	2
Included email accounts	2	5	20
Stock Photos	5	10	20
One-Time design fee	\$799*	\$1,199*	\$1,599*
Monthly hosting and email	\$9.95/m	\$14.95/m	\$19.95/m

* Please add an additional \$500 charge if you are not planning on hosting your website on my servers.
