Search Engine Optimization

On-Page Optimization is a process of making your website pages relevant to targeted key word search phrases, and improving the natural (or organic) search results. In short, optimizing your website will improve targeted organic search traffic to your website.

Optimization alone can not guarantee results. Search engines use complex algorithms that are closely guarded secrets to provide the most relevant information to the billions of daily searches in the blink of an eye. High quality, informative, and natural content is important.

Features:

- Professional Keyword Research
- KEYWORD & DESCRIPTION Meta Tag creation
- Page Title Creation
- H1 Heading Tag Creation
- Image ALT Tag Creation
- Site Map Creation
